

A person wearing khaki pants and a blue shirt is using a white and orange STIHL leaf blower to clear a pile of brown autumn leaves. The blower is held in their right hand, and the air stream is directed at the leaves, causing them to fly into the air. The background shows green trees and a clear sky.

**STIHL**®

A stylized orange maple leaf with a white outline, positioned to the left of the text.

# STIHL BATTERY POWER

**Demand for cordless power tools is booming globally, and it's no different in South Africa's discerning power tool market.**

## STIHL COMPACT CORDLESS POWER SYSTEM

- Enjoy total mobility inside and out.
- As powerful as STIHL petrol products thanks to extensive STIHL research and development.
- Lithium ion batteries can now be charged and recharged several hundred times with no loss of capacity.
- Working time is longer, recharging time is shorter. It only takes 80 minutes for the STIHL AL 101 charger to fully recharge a completely discharged AK 10 battery.
- Only one charger is needed for all four power tools: cost effective and convenient. The battery is also compatible with the STIHL Cordless System PRO charger.
- No messy mixing of fuel, no emissions, no noise (no ear protection required).
- STIHL technology has ensured the perfect balance between lightweight handling and impressive performance.

**Lithium ion  
batteries are  
maintenance free  
and have low  
levels of self-  
draining.**

When you see this sign, you can be assured of good service, quality STIHL products, experienced advice and instruction on the use of your new STIHL Product.

# Let us show you how

Knowledge is power the saying goes, and with STIHL you'll get both. STIHL will provide a top quality, high performance power tool for any tasks you've planned for this Autumn and Winter. The knowledge part of the deal is provided by our nationwide network of 180 expert STIHL dealers, who'll offer advice on what tool you need to achieve what you plan to do, and then give guidance on using and caring for it. That's in addition to their dedicated after-sales service.

At this time of the year, there's quite a lot to get busy with. Some of the seasonal tasks that you and your STIHL tools might need to address include:

- Removing moss and green grime from tiles, patios and pathways: quickly and easily dealt with thanks to the power of STIHL sweepers and high pressure cleaners.
- Doing a last-time-this-season trimming of the lawn and grass edges: STIHL brushcutters and trimmers do the trick and can easily manoeuvre around garden pots and steps.
- Dealing with the never-ending drifts of leaves: STIHL has blowers that will make light work of this chore. It's not just a question of neatness – leaves left on your lawn will block out sunlight, causing bare patches and encouraging mossy growth.
- Taking the removal of organic matter a step further for the sake of your plants: use a STIHL vacuum shredder to transform leaves and grass clippings into mulch to give your garden a nutritious boost.
- Pruning and neatening shrubs and hedges: STIHL cordless pruning shears, hedge trimmers, pole pruners and telescopic saws are what you need!
- Tidying up overhanging branches and chopping the wood into neatly stored stacks of firewood with one of the handy STIHL chainsaws, sized according to your needs.

With the diverse range of STIHL power tools at your disposal, you'll soon have the garden shipshape so you can enjoy your mid-year hibernation in front of the TV. Go along to your nearest STIHL outlet for a chat, our dealers are there for you. With them you'll discover the power of knowledge, and the power of STIHL.
