

Staalmeester GR600 Forage Harvester

GR 600 can be equipped with a final re-chopping plate, for a very fine chop. Can chop or cut any type of plant material wet or dry: Sugar cane, Lusern, Grass, Beet Tops, Prickly Pear or any other type of vegetable, in bales or loose.

Heavy duty auger transports material directly to the chopping rotor. Can be easily converted for different uses. 6 Cutter knives can be removed in pairs, and are easily adjustable for different cutting lengths.
