

Enorossi DR420 Tedder Rake

The double rotor Tedder Rake is an ideal machine for the most demanding hay makers and is suitable for medium to large farms.

The machine is versatile; it performs 4 functions: spreading, overturning and forming the central and lateral swath.

The adjustments to go from one function to another are simple and quick. The DR 420 4R rake adapts to any working condition, even the most extreme.

SPECIFICATIONS:

- Is equipped as standard with twin pivoting tires that increase stability, especially on rough terrain, and ensure that the machine follows the tractor's movements.
- It is equipped as standard with a cardan shaft with slip clutch and a swath deflector.
- The working width can be adjusted by sliding the main frame from a minimum of 3.70 m to a maximum of 4.20 m.

The cam is made of cemented ductile iron and steel rollers.

Twin pivoting wheels 15,600-6.

Position change system from rotary rake to tedder.
