

Enorossi Fertiliser Spreader

Fertiliser spreaders are used for applying granular fertilisers and pesticides to turf.

In order to guarantee a perfect descent of the product, the Enorossi SPF series spreader is equipped with a pressed steel hopper in one piece.

It is possible to intervene with the distribution of the product to obtain a localised or uniform spreading.

INCLUDED:

Articulated agitator.

SPF Series with P.T.O.

Available with Polyurethane or galvanised hopper.
