

Junkkari HJ172 Wood Chipper

The new Junkkari HJ172 chipper is suitable for chipping trees less than 17 cm in diameter. As the smaller model, this chipper also has a feeding angle of 45 degrees to the disc.

The new modern design of the HJ172 chipper includes separate frame and several user-friendly details. It is equipped with a hydraulic feeding device. It has one feed roller powered by the tractor's hydraulics. The handle is used to control the rotation of the feed roller.

The HJ172 chipper has four blades that can be continuously adjusted depending on the desired wood chip size. The blower wings will finalise the wood chips and effectively blow the chips to the desired location through an adjustable discharge chute.

NOTES:

Blade adjustment, sharpness, blade setting, size and type of wood to be chipped have a significant effect on the power requirement.

SPECIFICATIONS:

Feed opening size	20 x 20 cm
Disc diameter	74 cm
Disc mass	106 kg
Blade count	4
Revolutions	540–1000 rpm
Blade setting	3–20 mm
Max wood diameter	17 cm
Chipping capacity	4–8 m ³ /h
Power requirement	20–50 kW
Weight	550 kg
Length in working position	220 cm
Length in transport position	160 cm
Width in working position	160 cm
Width in transport position	160 cm
Height in transport position	240 cm
