

Soilmaster 2m³ Vertical Feed Mixer

Small but powerful.

Efficient mixing is the key to good feed production.

The Soilmaster feed mixer is the ultimate solution for production and cost-effectiveness when it comes to small-scale feed mixing.

The Soilmaster comes with two different fixed knives that adjust the cutting length of the material to the preferred length.

The mixing auger is equipped with 7 additional cutting blades that deliver faster and more effective mixing results.

Also equipped with a hydraulic opening door that can be converted if needed.

There are a few options available: electric, tractor mounted with or without wheels.

SPECIFICATIONS:

Volume	2 m ³
Number of spirals	1
Number of blades	7
Unloading from right side	std.
Weight	400 kg
Power required	30 hp
Hydraulic pressure	Tractor
Thickness of spiral	6 mm
